...THIS "KH6BZF REPORTS"/OBSERVATIONS COVER A PERIOD: TODAY, 09 JUNE through 03 AUGUST 1987...

...This past week was rather a "HO-HUM" week of H.F. PROPAGATION. On the 6th JUNE, we had an ACTIVE-to-MINOR STORMY conditions and the GEOMAGNETIC FIELD was distrubed. However the source of the DISTRUBANCE remains UNKNOWN at this writing.

...MUF's are expected to remain LOWER this rotation of the SUN until approximately 15-19th JUNE. This due to lack of SUNSPOT activity which lowered the SOLAR FLUX/OUTPUTS and MUF's accordingly. This all due to active ReGioNs,now on the non-visable side of the SUN's surface, were decaying when they rotated over the West Limb last week and the week before. Watch for some N-S Trans-equatorial paths for propagation on 15 and 20 MTRS. Some 40 MTR activity may, MAY be heard, but Summer QRN/QRM in the Northern Hemisphere may render 40 MTRS useless...

...ALWAYS CHECK WWV at 18-mins after each hour (updated every 3-hours:0000, 0300,0600,0900,1200,1500,1800 and 2100hrs), for updated information ALPHA and SOLARALERTS, etc. Some SPORADIC Es MAYBE EXPECTED. WATCH: Both 10 & 6 MTRS!!!GUD LK!

".....WE PAUSE FOR THESE THOUGHTS FROM RAINBOW BAY:.....IF YOUR DOCTOR DRIVES A JAGUAR...GET A SECOND OPPINION!!!

...PROPAGATION FORECASTS,...LIKE BABIES...ARE EASY TO CONCEIVE...BUT HARD TO DELIVER!!!... GOOD HUNTING...GOOD DX...GOOD
